Name: $\qquad$

Read each question carefully before answering. Answer all parts. Show all work, calculations, and/or reasoning, otherwise no points will be awarded. Properly labeled loops must be shown on K-maps. Assume that you have access to gates with as many inputs as you need to create minimum cost circuits. Point values are as indicated.

1. $F(A, B, C)=\Sigma m(0,1,3,4,6)$
(a) (5 points) Using a K-map, find the minimum SOP expression.

|  | $A$ |  |
| :---: | :---: | :---: |
| $B C$ | 0 | 1 |
| 00 |  |  |
| 01 |  |  |
| 11 |  |  |
| 10 |  |  |

$$
F_{S O P}=
$$

$\qquad$
(b) (5 points) Draw the circuit diagram.
(c) (5 points) Determine the number of gates and inputs in this circuit:

Gates: $\qquad$
Inputs: $\qquad$
(d) (5 points) Find the minimum POS expression.

$$
F_{P O S}=
$$

$\qquad$
(e) (5 points) Draw the circuit diagram.
(f) (5 points) Determine the number of gates and inputs in this circuit:

Gates: $\qquad$
Inputs: $\qquad$
(g) (5 points) Draw the circuit diagram of the equivalent NAND-NAND expression.
2. $F(A, B, C, D)=\Pi M(0,3,4,8,9,10,14)$
(a) (5 points) Using a K-map, find the minimum SOP expression.

|  | $A B$ |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| $C D$ |  | 01 | 11 | 10 |
| 00 |  |  |  |  |
| 01 |  |  |  |  |
| 11 |  |  |  |  |
| 10 |  |  |  |  |

$$
F_{S O P}=
$$

$\qquad$
(b) (5 points) Draw the circuit diagram.
(c) (5 points) Determine the number of gates and inputs in this circuit:

Gates: $\qquad$
Inputs: $\qquad$
(d) (5 points) Find the minimum POS expression.

$$
F_{P O S}=
$$

$\qquad$
(e) (5 points) Draw the circuit diagram.
(f) (5 points) Determine the number of gates and inputs in this circuit:

Gates: $\qquad$
Inputs: $\qquad$
(g) (5 points) Draw the circuit diagram of the equivalent NOR-NOR expression.
3. Use the Quine-McCluskey method to find the minimum SOP expression for the following expression. Each column containing implicants is worth 5 points. The Prime Implicant table is worth an additional 5 points.

$$
F(A, B, C)=\Sigma m(1,3,4,5)
$$

| Column 1 | Column 2 | Column 3 |
| :--- | :---: | :---: |
|  |  |  |
|  |  |  |
|  |  |  |
|  |  |  |

| Prime Implicants |  |
| :--- | :--- |
|  |  |

(a) (5 points) Write the minimum SOP expression.

$$
F_{S O P}=
$$

$\qquad$
4. Use the Quine-McCluskey method to find the minimum SOP expression for the following expression. Each column containing implicants is worth 5 points. The Prime Implicant table is worth an additional 5 points.

$$
F(A, B, C, D)=\Sigma m(0,2,8,9,10,11)
$$

| Column 1 | Column 2 | Column 3 | Column 4 |
| :--- | :--- | :--- | :--- |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |

| Prime Implicants |  |
| :--- | :--- |
|  |  |

(a) (5 points) Write the minimum SOP expression.

$$
F_{S O P}=
$$

$\qquad$
5. $F(A, B, C, D)=\Sigma m(1,3,4,5,7,13)$
(a) (5 points) Draw the minimum SOP circuit.
(b) (5 points) Draw the equivalent NAND-NAND circuit.
(c) (5 points) Draw the equivalent OR-NAND circuit.
(d) (5 points) Draw the equivalent NOR-OR circuit.
